Thence
TechSpace, 2316 16th Cross, 27th Main Rd, HSR Layout, Bengaluru, Karnataka 560102

Dear Hiring Team,

I am writing to express my interest in the Front-End Developer position at Thence. With over two years of experience in developing and optimising web applications, coupled with my passion for technology and innovation, I am confident in my ability to contribute effectively to your team.

In my recent role at FlyPigeon Digital Technologies, I played a pivotal part in the development of several key projects, including a B2B and B2C booking platform, a logistics management system, and a grocery delivery web application. My work involved close collaboration with business and UI/UX teams, the creation of complex reusable components, and performance optimization using techniques like windowing, lazy loading, and code splitting. I also have hands-on experience integrating with various APIs and payment gateways, ensuring seamless user experiences.

At Cashapona Technologies, I contributed to the development of SenditCertified, a secure communication platform. My responsibilities included developing rich, dynamic components using React, Redux, and Material-UI, while adhering to best practices for security and responsiveness. These experiences have honed my skills in JavaScript, TypeScript, HTML, CSS, and various front-end frameworks and libraries such as React, Next.js, and TailwindCSS.

I am particularly drawn to Thence because of its outstanding reputation in user-centred design and its commitment to delivering innovative digital solutions. Additionally, Thence's consulting services, which provide strategic guidance and practical solutions to businesses, align perfectly with my interest in leveraging technology to solve complex business problems.

Please find my resume attached for your review. I look forward to the opportunity to discuss how my background, skills, and enthusiasm can be in sync with the exciting work being done at Thence. Thank you for considering my application.

Sincerely,

Phanindra Reddy
