CGPA : 9.5

PROJECTS

Landing Page and Grid Website
Developed a landing page for a Product and GRID Website using HTML & CSS. The website is completely responsive and fits different screen sizes.

Portfolio
Designed and Developed a Porfolio to show my Skills and Projects, I even used Emailjs--com for conatct form and react-router to make multi-page website.

CRUD Applications
CRUD Apps like Contact Book and React TODO App where we can peform crud operation in a database. I used fiebase for Contact book and localstorage for TODO app.

An API-connected website
Developed COVID Tracker and Weather App and Recipe App using API's like API setu, edamam api, openweather api.

Expense Tracker
Designed and Developed a Javascript Expense Tracker and React Expense Tracker to track expenses and income

Clones using React
Yotube clone using react hooks, react-router, material-ui and youtube api's.

Amazon clone using react and firebase. I added authentication to signin and signup and we can add items to cart and a checkout option using stripe.

Google Drive clone using react and firebase. I used fiebase for authentication and as realtime-database so every user can save their own files.
